## **G MEDICAL GRANTED 'CE' CERTIFICATION FOR G MEDICAL PATCH (VSMS)**

- *New 'CE' certification opens doors for launch and commercialisation in Europe and other territories.*

Mobile and e-Health company **G Medical Innovations Holdings Ltd (ASX: GMV)** is pleased to announce it has been granted European 'CE' certification for its G Medical 'Patch with Extended Holter' device (the **Vital Signs Monitoring System or VSMS**).

This is a key milestone for the company, such that the product now officially complies with all relevant European medical and safety requirements as a Class IIa Medical device. This certification allows the Company's Vital Signs Monitoring System to be adopted across hospitals and clinics (and other healthcare and aged care facilities requiring monitoring services), as well as being prescribed by physicians and doctors for remote patient monitoring and care, throughout Europe and additional countries accepting 'CE'.

G Medical's VSMS or 'Patch' (GMP), is a professional real-time patients continuous monitoring solution. This modular solution measures a wide range of vital signs that are automatically presented in a call centre (IDTF) or hospital settings. The GMP assists in diagnosing patient complaints and conditions remotely, from pre-hospitalisation, hospitalisation and through post discharge home-based settings.

This certification means that the Company has now cleared another important regulatory barrier for the VSMS and importantly allows G Medical's full product offerings, including the already 'CE' approved PRIZMA Smartphone device, to be adopted by the Company's existing and potentially new partnerships in Europe and other territories accepting 'CE'. Of further significance, this certification also allows for the fast-tracking of the approval process in territories that recognise 'CE' as a precursor.

**Commenting on the 'CE' certification, G Medical CEO Dr. Yacov Geva, said:** *"Being granted 'CE' certification for our G Medical Patch unlocks the doorway to our full suite of medically certified devices. With both the Patch and the PRIZMA we effectively provide total solutions from Hospitals through to individual consumers, monitoring and collecting medically relevant and certified data across a broad spectrum of chronic health conditions and vital signs monitoring requirements. We do this in a disruptive and highly cost effective and scalable manner and this certification allows us to adopt the Company's full business and revenue models in these territories".*

G Medical has already received the relevant regulatory approvals for its PRIZMA Medical Smartphone Case, for the U.S., Europe, Australia and New Zealand. The PRIZMA is one of two key products developed by G Medical and is aimed at everyday consumers focused on their medical health and wellbeing. The PRIZMA allows consumers to turn their smartphone into a mobile medical monitor to measure a wide range of vital signs, with the added advantage that users are able to store their medical data in the cloud and share it with third parties such as healthcare professionals and family members.

The company offers total solutions that include medical devices, Apps and services. These full solutions will shortly be available to consumers through various sales and distribution channels from direct B2C channels to distributors, carriers and other partners.

With similar regulatory approvals being sought in the U.S., China, Australia and other markets in line with the Company's business strategy, G Medical is excited with the progress that has been made to date and looks forward to providing business development and regulatory approval updates to shareholders as they unfold.
